## Utorrent free movies search

Download torrent from the most popular trackers IMDB.com and Kinopoisk.ru This extension allows you to download movies from the popular sites IMDB.com and kinopoisk.ru. The download torrent button appears under the movie's name on the IMDB.com, also you can find it next to the poster on the kinopoisk.ru. Click on Download torrent and select any of the supported trackers: - Pirate Bay - Pirate Bay (thepiratebay.org, thepiratebay.se) - RuTor.org - OpenSharing.org - Free-Torrents.org - NNM-Club.ru - RuTracker.org (Rutracker) - MegaShara.com Search and download video online. There are hundreds of choices available on the Internet when it comes to downloading torrents. Finding the right torrent sites can take up a lot of time. When the authorities took down PirateBay and Kickass torrents, a new term evolved in the torrent industry: torrent search engines. It works simply as Google does (theoretically). It does not host any data, but searches torrents on other sites, hosting these torrents as per your query. This shrinks the list of your favorite torrent sites to some torrent search engine sites. And I admit, there are legal issues when it comes to torrenting, and using these search engine sites can get you in trouble, depending on where you are. It has been a violent case of fierce censorship ever since the ban on The Pirate Bay. You can stay anonymous by using a secured VPN connection to avoid legal issues that may occur. Best Torrent Search Engine 2020 Our editorial team manually tested more than three dozen torrent search engine sites and found the best 20. MUST USE AD-BLOCKER Search Engine Best known for Torrentz2 Incredibly able search engine; Currently indexes more than 60 million torrents. Torrents.Me Parallel Search in 600+ Torrent Sites XTORX Very Simple UI; Fast and accurate; No ads. Toorgle Torrent Search in over 450+ torrents sites at once. AIO Search Google by Torrent Stuff Zoogole Movies Search only Veoble Powered by Google custom search; Tons of filtration options; All popular sources covered. Academic researchers only for researchers TorrentSeeker Minimal UI, Custom search results; Wide range. Snowfl Very fast; Easy to use; Custom filtering included. Pirate Bay Big Head of Torrents RARBG Most Miscellaneous Torrent Repository 1337xA of the largest engine for movies, games, TV series and more ExtraTorrent Largest Torrent Community YTS. AG Films Exclusive BTDBS mist and efficient; Pure design; Quick search. TorrentHounds Most Resilient Torrent Community Lime Torrents Redesigned and Improved Features Torrentz2 This torrent search engine takes the look of the site before it, a site that was taken down by the authorities due to illegal activities involving copyright infringement. The interface is still the same, so you can search for 6 million + torrents from more than 94 torrent sites. Torrentz2 combines results from many other torrent finders to present you with you are looking for. No ads appear on the site, but it's recommended to use ad blockers and other security downs to avoid accidents anyway. Official website Toorgle Toorgle uses Application Programming Interfaces of Google - the search giant - to look for torrents on more than 450 different sites. So far, the index contains most sites out of any other torrent search engine. Toorgle also works well in speed and stability because it retrieves its data from Google directly. It also provides the ability to add the toolbar to the Firefox browser or Facebook The latter is rarely recommended due to security issues. You should never attach your social media account to such sites. Toorgle uses ads to generate revenue, so it's recommended never to disable ad blockers. To avoid identity theft, don't forget to use VPN too. Official site XtorX XtorX is similar to many other torrent search engines discussed here. This site has nothing to do with hosting torrents, instead providing a better way to search other torrent sites under an umbrella. XtorX is a clean and simple torrent finder site that generates results from Google using the Custom Search feature. The results are generated very quickly according to the query. By clicking on the link, you will be taken to the next site where torrent is hosted. Unfortunately, you cannot filter down your results on this site. Most of the time you will be redirected to another site. This is another con of this site. No ads appear on this site, so you should be very careful about your security. Official site AIO Search AIO Search is the most favorite torrent finder among the masses. This site allows you to search a specific torrent on multiple sites using the user-looking search (similar to Google) and return the results on the search engine results page. This search extends to 50+ sites including RARBG, ISO Hunt, KickAss, The Pirate Bay, and vice versa. AIO Search also has Chrome and Firefox extensions that can further facilitate your search if you are a regular torrent user. This site also has a Facebook application, which is not recommended to use. Make sure you use a VPN and an ad-blocker before going to a torrent website through AIO Search Official Website: TorrentSeeker TorrentSeeker is a clean and wonderful torrent engine. The homepage is designed with Material, giving it beauty and simplicity. It uses the Google Custom Search feature to search top-100 torrent sites, which include LimeTorrents, RARBG, and Toorgle, another torrent giant. The amazing thing about TorrentSeeker is that the developers are constantly updating the index. The index includes the small niche and language-specific sites, giving you a wider range of searches. The site does not use any kind of advertising - which reminds me of the quote, nothing is free on the Internet, so you may want to use VPN software. VPN software. The site Monova Monova was one of the best torrent search engines. Now updated with a clean design and dozens of annoying pop-up ads. It's not a great site to visit. I tried to search for it, but the results do not include any similar pages, although it was the name of a very famous film from 2002. People can like this site because of the ultra-fast updates that come every minute and can be seen on the site. You can also sign up for this to enjoy the user-specific website. Monova will ask you to disable your ad blocker, but you shouldn't do so if you want to avoid injecting your device with malware. Don't forget to use VPN privacy software too. Official website TorrentHounds This is one of the most attacked sites by law enforcement agencies around the world, but it is still resistant enough to sustain itself for more than a decade. Since its launch, it has given users free movies, music, software, books and much more to download. Recently, due to increased lawsuits and raids worldwide for similar communities and websites, TorrentHounds is moving to binary channels, where it is safer and less exposed to the law governing the authorities. Notification to switch to the binary channel is available at the top of the site, which also helps you configure it to continue using the site. Official site AcademicTorrents No, this is not the site to download movies, music, games or p0rn. This is purely an academic website for downloading research articles, datasets, notes and lectures, etc. It is a joint project of the University of Michigan and the University of Texas along with others to build a distributed system that allows them to share academic files over the Internet. It is supported by many commercial sponsors. AcademicTorrents is considered a leader among torrent search engines for academics. If you are a researcher and want to share or access large datasets over the Internet, you should try this site immediately. We are trying to get more information on this website and will share it soon. If you like this torrent site, go ahead and donate to the researchers on the site Official website Veoble Veoble is a complete search engine that allows you not only to do normal queries, but queries for torrents as well. This site has three tabs in the top navigation bar, from which you can select Home for regular searches and Image search images. Veoble indexes more than a dozen torrent sites. You can also filter down the results using language filters. Veoble uses Custom Google Search to generate the results. The revenue of this site is generated by ads on the search results page using Google AdSense, which works well, but it is still recommended to use security benefits. You can also make this website your website. Official site Zoogole Zoogole is google of film torrenting sites. You hundreds of movies here, all together collected from The Movie Database (TMDb). You can also find TV shows to Everything is organized beautifully. They confirm each torrent before making it available for download to other users. Movies are available for download in 720p, 1080p, and even in 3D. Torrent is quite simple. You have to avoid the direct download button because it is a click-bait/booby trap. Ads on this site can be easily avoided using ad block extensions. It is also recommended to use a VPN as well. Zoogole is a top-choice uTorrent movie search engine. Official site Torrents.Me Torrents.Me is one of the most beautiful designed torrent search engines. I'd like to put it at the top of the list. This site is designed by some great developers. It allows you to know the most trending torrents and topics on the Internet. This site also has a built-in system to rank it in different niches, such as movies, games, books, software, etc. Just like other sites, you can also search and download torrents here of all kinds. The search function is not its own. It generates search results from Zoogole, TorrentSeeker, and Torrentz2, all of them great search engines. Official site BitTorrent Database BTDB is a clean and effective search site for torrents. Indexing more than 1 billion torrents, it seems to be the largest torrent search site. Not only does the results page give you links to torrent, but the magnetic link as well. We recommend this site if you want something very simple. There are no hidden tricks here or advanced features. You type something in a search box, and BTDB will show a bunch of results. However, take a closer look and you'll find some features that will help you get the job done in a short time. You can also sort search results using filters such as relevance, size, files, add time, and popularity. Official website Snowfl Basically, this torrent engine may seem to be for the advanced users just because of the ability to filter your results using multiple features. Although it has a strange name, Snowfl is a very simple torrent search engine. There are no distractions here, except for occasional ads. The homepage brings a prominent search bar at the top and the list of results above the rest of the interface. This site is very clean in design and can be very useful to search torrents when you get used to it. Please share with us your feedback for the site. Don't forget to use the safety depositouts no matter how clean it looks. Official site CiniSearch CiniSearch mainly aims for movie torrents that use google API to produce relevant results. The site user interface is decent enough, but we recommend using a reputable VPN and ad blocker to avoid identity theft. Official website ThePirateBay The Pirate Bay is the major boss of the torrent market. So far, it is known to be the most resilient. Pirate Bay was developed in 2003. The founders still face a copyright infringement, including in Swedish courts. It is one of the best alternatives to KAT Torrents. When the website used to display X-rated ads to generate revenue. Not anymore, however. Use an ad blocker to browse this site without having to worry about the cheap ads. Official website RARBG RARBG is among the most visited torrent sites ever. With millions of traffic every month, this site serves torrents related to movies, music, software and much more. The site is very easy and user-friendly to use. There's one thing that's pretty ugly about this site: new tab ads that open on each click. You can even get rid of them using ad blockers. Seeds are usually good on this site because of their age and reputation. But they need to use some alternative way to generate revenue instead of these annoying ads that can let them lose traffic. It is also recommended to use a VPN also to avoid being caught by Internet service providers Official website ExtraTorrent ExtraTorrent is one of the most used and most beloved torrent sites on the Internet. This site allows you to search and download free movies, music, software, games, wallpapers, TV shows and much more. You can also download premium courses from Lynda, Udemy, and many other e-learning sites for free here. This site also serves as a good source for torrent-related news. ExtraTorrent is more like a torrent community where you can sign up and enjoy the interaction with other users, comments on torrents, and ask for more torrents that are not available here. Official site yts. In 1999 it became 100 000 000 AG is a fantastic site for torrent lovers. It is a kind of torrent search engine for movies. The user interface of this site is very easy and easy to use. It's just like you're browsing and searching Hulu or Netflix in your browser. You can download movies and TV shows in multiple resolutions, including 720p and 1080p and multiple formats like DVD Rip and Blu-Ray. Don't worry, you'll always get what you clicked on. Ads aren't that annoying on this site and can be blocked by simply using an ad blocking extension in your browser. There's nothing to do with it. AG also allows you to get subtitles of the movies. If you don't get them, you can download them from the YIFY site, their sister site. Official site LimeTorrents Lime Torrents, with its new Lime-colored user interface, claims to allow you to download the verified torrents. The design is simple but beautiful. The front page looks like you're visiting a search engine of fruits and vegetables. (removed non-essential statement). But inside there is hidden a large database of movies, music, books, software and much more to download via BitTorrent. This site allows you to search your favorite torrents either by searching via the query on their website or by browsing categories on the site. The inner interface of that site is not as attractive as the front page, but still it helps a lot with find the right place in the right place. It is the people's choice for uTorrent movies Official website Katcr.co Katcr.co is a wonderful clone of Torrents website, packed with beautiful features and a download archive. It is clear that it is not run by the same people after it was hit by the authorities a few years ago. You can either search for your favorite torrents or go through the categories. Official website ISOHunt After being unable to survive several attacks from the police from all over the world, ISO Hunt shifts to the binary channel. You will find this banner and details to install the Binary client at the top of their website. For this purpose, they use Usenet, which is a fantastic service to find and download digital media, giving you the speed and reliability you won't find with other file sharing services. Official site PopcornTime PopcornTime is netflix of torrent lovers and the best among movie torrent search engines. This is not a torrent site, but an application available for Windows, Mac, Android and iOS. This allows you to search and watch movies directly from torrents. This is like streaming the movie from torrents, which are also downloaded to your device. Does that sound complex? Absolutely not! This is the easiest way to watch your favorite movies. This program automatically searches for the best torrents in 720P, 1080P and 3D, and then shows you the number of seeds. You can choose in which format you want to watch. This is the best uTorrent movie search engine. Official Site FAQ A: It's as simple as opening sites on another browser Q: How do I find torrent sites? A: The websites we listed are the authentic ones. You don't have to waste any more time looking for them. Q: How do I get a torrent link? A: You just need to search for the desired things in the listed sites and get the download link there. How to download Torrents? There are several torrent clients or torrent downloaders available online. We recently covered them in the moldings. Best Torrent Download Clients Security Concerns About Torrent search engines There are many concerns about the use of torrents to download movies. Unfortunately, most of it is true. Torrent downloads are mostly flagged as dangerous to use because of the associated risk of malware. There are very few websites that use BitTorrent and are clean in nature. Pirate Bay options that came after the shutdown were mostly loaded with malware and phishing scams. They infected millions of users worldwide. Some of the most reputable torrent sites were also hijacked by spammers and hackers. They used these sites to infect people who download torrents. Leading browsers such as Mozilla Firefox and Google Chrome banned these sites on their platforms. Twitter also flagged the links to TPB Torrent as malicious. Later, they solved this problem. Malware Hidden in Torrent Files Malware or Trojans hidden in these sites including Rookkits and Remote Access tools as well. Crypto-Malware unlocks your device and asks you to pay a ransom to lock the important files on the Malware that is not crypto in nature can also do serious damage and can use remote access tools as a way to hack the system and use it as a stepping stone for cybercrime. These crimes include attacks on public computers and Domain Name System (DNS) servers that are deadly on larger scales. This is very alarming for those who are not aware of the dangers of downloading torrents. The story is full of such examples where hackers gained access to several victims' computers to carry out attacks on government agencies. Unaware of such things, many people found their computer used for such attacks. Another major concern for torrenting is the change of files. Not a single person has control over the file because each file moves through different users. All users can change it and add malware to the files. This is usually in the case of software packages and operating system deployments. Movie files are usually safe to watch. Because people only watch movies, malware is easily visible. You can observe the infection in the form of immediate effects and long-term effects. The immediate effect of these events will be to slow down your computer. In the longer term, this will expose you to being held for crimes that you have not even committed. So always be careful. Preying on the host computer is what malware does. Thus, while using any torrent service, it is very important to assure your security. You can do this in the following ways: Ad blockers and VPNs can save you These are simple browser extensions that help block servers and links that show these ads to you. Some of these extensions and add-ons also come with the ability to block trackers, including those from social media like Facebook as well. Most of these apps are free and you can download them from extensions or add-ons market in the browser you are using. Nevertheless, you'll need to read reviews about these because an ad blocker has access to all websites you visit, and it may or may not collect your data as well. VPNs can do quite a lot, from protecting your identity to keeping you from being caught by Internet service providers or law enforcement. You can assure your privacy using these tools. When choosing your VPN software, you need to read a little about that particular software. Some VPNs are also known for selling your data to advertising companies, sometimes even on the black market. So it is necessary to choose a VPN software that has a good reputation in the market and no evidence of data theft reported about the relevant software. So be sure to use these while browsing torrent search engines. What are Seeders, Peers and Leechers? SEEDERS: These are those who have already downloaded the file or basically are the parent or uploader who uploads the torrent seeds to others. When you download the file through torrent successfully, it changes the download status to which you can also turn off. It is not a good idea to seed when you a slow or restricted Internet connection. PEERS: These are the ones that download and upload at the same time. Peers do not contain the entire file, only containing bits of the files. Seeding can be prevented during the download as well. Lowest in the ranking, these are those who do not have all parts of the file and cannot share with you the required part of the file. Windows 10 Uses Torrent to update well, this is some extra information for those who are concerned about the legality of torrenting. When Microsoft Windows releases new versions or updates, servers were slammed with traffic. To overcome this, Microsoft introduced Windows Update Delivery Optimization in Windows 10. This uses torrent-like systems where you not only get the update files from Microsoft's servers, but also from local computers that have already downloaded the updates. This way, downloading updates will be faster for users and less overbearing on Microsoft servers. If this feature is turned on, share the small portions of the updates files locally, reducing the Internet speed. This gives influence to torrent search engines. Final Words We will ask you to be very careful while downloading torrents from these torrent search engines, mainly in countries where the law is reckless against such offenders. As an additional layer of protection, please use VPN to avoid being caught by the authorities. The last thing you want is to not be able to torrent. Torrent.
